

# WordPress CMS

Världens mest använda open source CMS-system

*Daniel Rytterqvist*

# WordPress statistik

- WordPress startade 2003 som ett rent bloggverktyg av Matthew Mullenweg  
[http://en.wikipedia.org/wiki/Matt\\_Mullenweg](http://en.wikipedia.org/wiki/Matt_Mullenweg)
- Idag drivs WordPress av The WordPress Foundation och är det största CMS systemet  
<http://wordpress.org/support/> och håller 15% av alla websidor.
- Antal WordPress siter: 73 930 942  
(ca hälften hostas av wordpress.com)  
<http://en.wordpress.com/stats/>
- WordPress is in use by 48% of the top 100 blogs in the world  
<http://royal.pingdom.com/2012/04/11/wordpress-completely-dominates-top-100-blogs/>
- WordPress is used by over 14.7% of [Alexa Internet](#)'s "top 1 million" websites and as of August 2011 manages 22% of all new websites.<sup>[4]</sup> WordPress is currently the most popular CMS in use on the Internet <http://en.wikipedia.org/wiki/WordPress>
- WordPress vs andra  
<http://www.google.com/trends/?q=blogger,+drupal,+sharepoint,+wordpress&ctab=o&ge o=all&date=all>
- Fler CMS <http://www.makeuseof.com/tag/10-popular-content-management-systems-online/>

# Mina sites

- <http://www.rytterqvist.se/>  
**Blogg om teknik/bygg/renovering, annonser**  
Ca 1 200 unika besökare per månad som ser på 1,5 sidor under 1,5 minuter
- <http://www.pysselparty.se/>  
**”scrapbooking”-blogg, e-handel**  
Ca 100 unika besökare per månad som ser på 2 sidor under 1 minut 10 sekunder
- <http://www.florablاد.se/>  
**E-handel smycken och tryckta florablاد (tavlor)**  
Ca 15 unika besökare per månad som ser på 3,5 sidor under 30 sekunder

# Tjänster från Google

- Google Analytics – statistik  
<http://www.google.com/analytics>
- Google AdSense – annonsintäkter  
<https://www.google.com/adsense/>

# Installation

- Microsoft WebMatrix

WebMatrix is a brand new web development tool from Microsoft that includes everything you need for website development. Start from open source web applications, built-in web templates or just start writing code yourself. It's all-inclusive, simple and best of all free. Developing websites has never been easier.

<http://www.microsoft.com/web/wordpress>

WebMatrix installerar Wordpress och använder IIS Express eller IIS samt MySQL antingen lokalt eller uppkopplad mot en extern server.

Fick problem installera PHP 5.3.13 <http://windows.php.net/download/>

- Apache XAMPP for Windows

<http://www.apachefriends.org/en/xampp-windows.html>

# Installation

- 5-minuters guide  
[http://codex.wordpress.org/Installing\\_WordPress](http://codex.wordpress.org/Installing_WordPress)
- WordPress <http://wordpress.org/download/>
- Xampp lägger sig här: C:\xampp\xampp-control.exe
- Extrahera WordPress-filerna hit: C:\xampp\htdocs\wordpress (eller annat sitenamn)
- Skapa användare i MySQL
- Justera credentials i wp-config.php
- Surfa till <http://localhost/wordpress>  
Installationen dras igång. Alternativt gå till  
<http://localhost/wordpress/wp-admin/install.php>
- Dummy-data: [http://codex.wordpress.org/Theme\\_Unit\\_Test](http://codex.wordpress.org/Theme_Unit_Test)

# WordPress plugin

- **19,531 PLUGINS, 304,409,619 DOWNLOADS, AND COUNTING**

<http://wordpress.org/extend/plugins/>

- Quick Shop

<http://wordpress.org/extend/plugins/quick-shop/>

- Slideshow Gallery

<http://wordpress.org/extend/plugins/slideshow-gallery/>

- Simple Lightbox

<http://wordpress.org/extend/plugins/simple-lightbox/>

# Codex

- Läs mer om hur teman är uppbyggda  
[http://codex.wordpress.org/Theme\\_Development](http://codex.wordpress.org/Theme_Development)
- Eller hur du skriver din egen plugin  
[http://codex.wordpress.org/Main\\_Page#Write\\_a\\_Plugin](http://codex.wordpress.org/Main_Page#Write_a_Plugin)
  - Fler tutorials: <http://pelfusion.com/know-how/20-tutorials-to-develop-wordpress-plugin/>
- Utveckla i PHP  
[http://www.developphp.com/list\\_php.php#Getting\\_Started\\_with\\_PHP\\_Programming](http://www.developphp.com/list_php.php#Getting_Started_with_PHP_Programming)
  - Utvecklingsverktyg: **texteditor** , **Eclipse PDT**  
<http://www.eclipse.org/projects/project.php?id=tools.pdt>  
eller **NetBeans** <http://netbeans.org/features/php/>
  - Fler tips <http://blog.calevans.com/2009/02/09/5-tools-every-php-developer-should-master/>
  - php-baserade siter:  
Facebook, Google, Wordpress, Joomla, Develop PHP, PHPBB,  
Zen Cart, Oscommerce, Web Intersect

# Utvecklingsverktyg

- En texteditor t.ex. Notepad++  
<http://notepad-plus-plus.org/download/v6.1.2.html>
- Firefox <http://www.mozilla.org/sv-SE/firefox/new/>  
med Firebug <http://getfirebug.com/>
- Chrome
